WORK EXPERIENCE

Product Designer

Grey Feathers

Mar, 2025 - Present | Remote

Tasks

- Solely Owned the **end-to-end product design lifecycle**, from understanding business requirements and conducting user research to designing, validating, launching, and iterating digital products.
- Conducted **user and product research** to understand customer needs, pain points, business requirements, and existing workflows.
- Design complete product experiences including **user flows, information architecture, wireframes, high-fidelity UI, prototypes, and responsive web/mobile interfaces**.
- Create structured **developer handoffs** with specifications, component documentation, interaction details, and design references to improve design-to-development accuracy.
- Work closely with clients, customers, and internal stakeholders to **present product concepts, conduct demos, gather feedback, and translate feedback into actionable design iterations**.
- Build and maintain **scalable Figma design systems** using components, variables, typography, color systems, and reusable patterns to improve consistency and accelerate design delivery.
- Participate in **product demos and stakeholder presentations**, explaining design decisions, workflows, and product functionality to clients and customers.
- Use AI-assisted tools including **Claude Code, Codex, Antigravity, Figma Make, UXMagic.ai, Lovable, and Framer** to accelerate ideation, prototyping, exploration, and design-to-development workflows.
